we design **solutions** to meet your
airfreight needs.

WE ARE RIOGALEÃO CARGO

RIOgaleão
cargo

RIOgaleão Cargo

Privatised in 2014 and guided by its majority shareholder, Changi Airports International, RIOgaleão, Rio de Janeiro's international airport, has delivered an ambitious R\$2 billion investment and operational improvement programme over the past years.

The airport is one of the main gateways to Brazil and Latin America, providing quality import and export services to the pharmaceutical and automotive and aerospace industries, the medical and technology sectors, and, by natural vocation, to Brazil's oil & gas industry, amongst others. Imports alone are valued at USD 10 billion annually (CIF 2022).

The RIOgaleão Cargo terminal is located just 20km from Rio de Janeiro's city centre and only 17km from the port. Connected to the regional and national road networks, it links the Southeast, South and Northeast of Brazil with the country's major import and export markets.

- 7 CAMPINAS SP
- 8 BELO HORIZONTE MG
- 9 VITÓRIA ES
- 10 ANÁPOLIS GO
- 11 ITAJAÍ SC

The RIOgaleão Cargo terminal lies at the heart of the “pre-sal” oil exploration area and is Brazil’s primary airfreight hub for the import and export of oil & gas equipment.

The centre of automotive manufacturing in the Vale do Paraíba (RJ) and the large pharmaceutical industries of Jacarepaguá (RJ) and São Paulo (SP) are within a short trucking distance from the airport, as are Rio de Janeiro’s aerospace industries.

The airport’s strategic location enables fast transfers to the neighbouring states of São Paulo (SP), Espírito Santo (ES), Minas Gerais (MG), Santa Catarina (SC) and Goiás (GO).

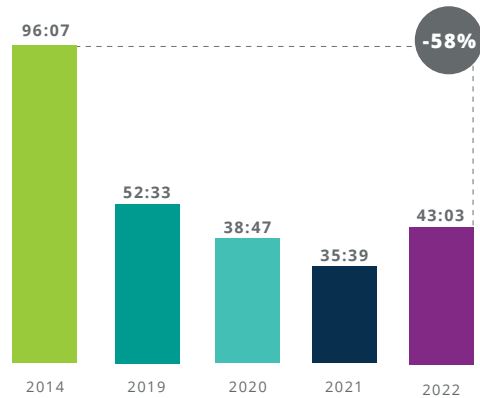

Efficiency & Performance

RIOgaleão Cargo's focus on operational efficiency led to a 58% reduction in the average cargo dwell time since the privatization of the airport in 2014.

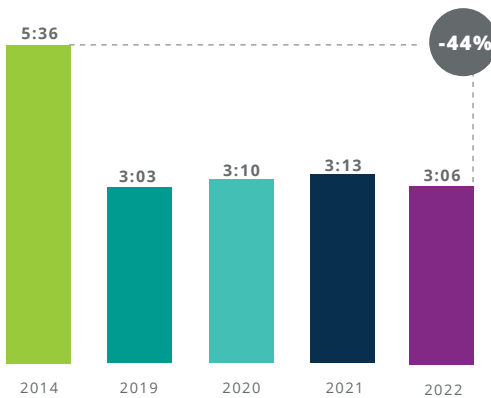

The airport's **Logistics Efficiency Program (PEL)** involves all stakeholders in the logistics chain, enabling our clients to identify bottlenecks and improve their clearing process resulting in significant time and cost savings.

Compliance & Integrity

We constantly seek the highest global standards in airfreight handling

- First airport in the Americas to be IATA CEIV Pharma certified
- ISO9001:2015 certified
- AFE (*Autorização de Funcionamento de Empresa*) / AE (*Autorização Especial*)
- ANVISA Best Practices (GDP)
- Authorized Economic Operator (AEO)
- Team of pharmacists

Client Support

Customized solutions & support for your projects and key flows

- Interface with government agencies
- Installation of customer tracking devices
- Technical support and regulatory advise
- Dedicated warehouse space for key accounts or projects
- Dedicated shipment monitoring and customized reporting
- Key account management
- Recommendation and coordination of service providers (customs agents, heavy-lift and road transport); technical support and regulatory advise
- Customer Service Center - 24/7

RIOgaleão Temperature Controlled

RIOgaleão Temperature Controlled

Pharmaceuticals can save lives. RIOgaleão Cargo seeks the highest global standards in life science handling to safeguard the products in our care.

Our customers rely on RIOgaleão Temperature Controlled to ensure the quality and integrity of a variety of cargos, ranging from vaccines or lab tests to biotechnological material or pharmaceutical products. Upholding these standards requires state-of-the-art equipment and storage facilities, highly-trained staff, robust and efficient processes and strong cooperation with all our partners across the cold-chain.

As the gateway for one of Latin America's largest pharmaceutical industries, RIOgaleão Cargo has tripled its cold storage capacity in the past years and handles all temperature ranges. Dedicated loading docks and our fully automated pharma storage facility eliminate temperature excursions. Seeking the highest international standards, we are Latin America's first airport to be IATA CEIV Pharma certified and our team of dedicated pharmacists ensures that our rigorous processes are upheld at all times.

“RIOgaleão has demonstrated high performance and commitment with the quality of our cold chain shipments... The infrastructure and staff from RIOgaleão were outstanding.”

Bruno Fricke, Head of Supply Chain, Roche

42 IFA shipments handled

during 2021-22, representing more than **150 million doses of C-19 vaccines**

- 22,350m³ / 2,165 pallet positions of cold storage capacity
- All temperature environments, ranging from -18°C to 22°C
- Fully automated storage system (transelevator)
- Temperature controlled loading docks and ante-rooms for inspections
- High-speed doors
- 128 power points for ACT
- 3 back-up generators
- Installation of customer tracking devices
- Temperature & humidity monitoring & reporting
- Pre-alerts for efficient receipt of temperature controlled cargo
- Team of pharmacists
- Dedicated pharma account manager

RIOgaleão Heavy & Outsized

RIOgaleão Heavy & Outsized

Beneath the world's oceans lie vast supplies of oil and natural gas. RIOgaleão Heavy & Outsized plays its part in helping you to unlock the economic potential of these resources.

Located in close proximity to the “pre-salt” off-shore exploration area, RIOgaleão is the main import and export gateway for the oil & gas industry in Brazil, offering secure operations with a high degree of efficiency and flexibility.

Given our geographical location and large international network, RIOgaleão is the airport of choice for Brazil's rebounding oil & gas industry. We have the expertise, equipment and trusted partners to efficiently handle all types of freighters as well as complex projects. Our experienced team coordinates all the players in the supply chain to ensure that shipments of any size pass smoothly through our airport.

We have the equipment, facilities and trusted partners to handle and store all your heavy & outsized cargo.

- Up to 30t main-deck loaders and up to 16t forklifts (larger equipment on request)
- Cranes and heavy load transport from trusted partners at preferential rates
- Dedicated storage area for outsized and heavy cargo
- An experienced Oil & Gas Team

Our airport was made to handle all types of freighters, efficiently and safely.

- 9 dedicated wide-body freighter parking positions
- Heavy-maintenance facility
- 24/7 operation, no capacity or slot constraints
- Capable of handling all cargo aircraft types

RIOgaleão Valuable

RIOgaleão Valuable

Valuable cargo comes in many shapes and forms - high fashion goods or irreplaceable artworks, bank notes or biotechnological material.

For us at RIOgaleão Cargo, the security of your shipment is our main priority and we regularly handle a variety of high-value cargos from all over the world.

To give our customers peace-of-mind, we maintain state-of-art security infrastructure but also ensure that all our staff are highly trained and extensively security-checked. Every moment of your valuable shipment with us is documented and monitored. Under the watchful eyes of our staff, your shipment will be handled reliably, safely, and as quickly as possible.

Our trained and security-checked personnel discretely monitor and track every movement of your valuable freight.

- High definition CCTV with more than 200 cameras and speed domes covering the entire cargo terminal
- 30 infrared cameras covering the perimeter road between passenger and cargo terminals
- 170+ security staff dedicated to the cargo terminal, operating 24/7
- 7 x-rays available to airlines and government agencies
- Vaults with electromagnetic locks and HD cameras
- Electronic and physical access control of all vehicles, staff and visitors
- Full track-and-trace from cargo receipt to delivery
- Customized operations for high-value shipments - Live monitoring with HD cameras; supervision of handling process by security staff; dedicated storage areas
